

# ISO 45001: 2018

## All you need to know

Thousands of lives are lost due to work accidents or fatal diseases related to work activities. These are accidents that could and should have been prevented, and must be in the future. ISO 45001 aims to help organizations do just that.

### What is OH&S?

ISO 45001:2018 is an occupational health and safety management system which defines a set of occupational health and safety management requirements. This system provides a safe and healthy workplace by preventing work-related injuries and illnesses.

### Can I apply?

This standard applies to all types of organization regardless the size and what they do.

### Key Benefits

**1**

## Identify Context

Establishing systematic processes which consider its “context” and which take into account its risks and opportunities, and its legal and other requirements.

**2**

## Minimize Risk

Determining the hazards and OH&S risks associated with its activities; seeking to eliminate them, or putting in controls to minimize their potential effects

**3**

## Increase Awareness

- Increasing awareness of its OH&S risks
- Evaluating its OH&S performance and seeking to improve it, through taking appropriate actions
- Ensuring workers take an active role in OH&S matters

ISO 45001 will help you

- To minimize OH&S risks.
- To eliminate OH&S hazards.
- To achieve OH&S objectives.
- To implement OH&S policies.
- To meet OH&S requirements.
- To investigate OH&S incidents.
- To pursue OH&S opportunities.
- To enhance OH&S performance.
- To respond to OH&S emergencies.
- To manage OH&S nonconformities.

## How be certified

You can also use this standard to get certified. Once you've established an OHSMS that meets ISO 45001 requirements and addresses your organization's risks and hazards, you can ask a registrar (certification body) to audit your system. If you pass the audit, your registrar will issue an official certificate that states that your organization's OHSMS meets ISO's requirements.

## How can we help you

We are 'Support implementers' who assist you throughout the journey to get certified in ISO 45001 by conducting awareness training, support to identify risks& opportunities, risk assessments and establishment of the system.
