

Negative impacts associated with ISO 30401

The path to any successful knowledge management system knows its limitations.

Some of the challenges face when implementing Knowledge Management System are:

- We have to seeks ways to efficiently capture and record business knowledge.
- Making information and resources easier to find
- Motivating people to share reuse and apply knowledge consistently to organization.
- Aligning knowledge management with the overall goals and business strategy.
- Choosing and implementing knowledge management technology.
- Integrating knowledge management into existing processes and information systems.

To overcome these challenges, you should:

- Develop clear processes to capture, record and share business knowledge.
- Define the scope and objectives of any knowledge management initiatives.
- Create a corporate culture of knowledge sharing between employees and management.
- Set clear goals and strategies to help you utilise the collective knowledge (otherwise, it will be of no use to your business).
- Consider budget, strategy and training needs for any new knowledge management system.
- Consider change management strategies for introducing new knowledge management practices.
